ABOUT

Self-taught developer building web apps, game concepts, and immersive fiction. I build things that work, worlds that feel real, and code that's intentional. I'm a beginner who actually builds things—bookshelves, games, libraries, stories, and design docs. That puts me ahead of most people stuck on tutorials.

PUBLISHED APPS

GameSpace

Android APK · 2026

A fully offline, customizable game library manager. Catalog games, add cover images, track ratings, organize into collections, and personalize the entire app.

Bookshelf

Android APK · 2026

An offline PWA library manager with a 3D wooden shelf interface. Store books, track reading status, and swipe through your collection.

Primary

Android APK · 2026

A color memory game. Memorize a target color and recreate it using RGB sliders. Score based on accuracy.

Stumble

Web App · 2026

A web randomizer that sends you to hidden, weird, and interesting corners of the internet with one tap.

GAME DESIGN DOCUMENTS

The Loop – 3D narrative platformer about breaking free from conformity and facing consequences.

Concrete Shift – First-person rhythm survival game inside a pipe filling with cement.

Escape The Sale – First-person maze runner about escaping a furniture store before the bill gets too high.

Animal Rider – Arcade racing game where drifting builds energy for a temporary overpower mode.

Ludo Roguelike – Classic Ludo board game fused with a chaotic card system.

CREATIVE WRITING

The Divided Subject – Body horror about a being trying to split itself in two.

The Immortal Dead – Existential dread about endless cycles of death and resurrection.

The Crawling Family – Fetal horror about a fused host and organism.

Friend and Foe – Duality between self-preservation and self-destruction.

SKILLS

HTML5 · CSS3 · JavaScript · IndexedDB · Firebase · Git & GitHub · Game Design · Creative Writing
